Application category (select the category in which your company is applying)

CAD / Measurement /
Tools

Industrial Electronics

Analog
semiconductors

Sensors

Military and Aerospace
Electronics

Digital
semiconductors

Automotive Electronics

Passive / Electromechanical
(relays, connectors, PCBs,
etc.)

Start-up of the year

Innovation identification

Designation of component or application

Component or application design

- Company where the component or application was designed

- City

- Country

Date of component or application launch

Description of the component or application

1. Technical challenge

2. Avantages over existing solutions

3. Impact on employment and development of the electronics industry (possibility of spin-offs, factory construction, etc.)

4. Impact on sustainable development
